

HIGHLIGHTS

MeriTo is a Smart Metering platform which helps you to keep your appliances and energy usage under control.

Whether you are manufacturer, company willing to have insight into energy management or individual seeking for cost-saving solution, **MeriTo** helps you to keep track on energy utilization and efficiency with realtime measurements and visualization.

Much like humans are learning through exploring, **MeriTo** explores your electrical wiring infrastructure and learns how your appliances behave. Unique cloud-based data analytics helps to prevent detriment caused by electronic equipment during its non-standard behavior or malfunction.

Non-intrusive design makes **MeriTo** easy to install at customer premises.
